Profile

Computer Science and Engineering undergraduate with hands-on experience in robotics, mechanical design, fabrication, 3D printing, and embedded systems. Progressed from Mechanical Team Intern to Mechanical Team Lead in the UIU Mars Rover Team. Practical experience includes mechanical component and assembly design, rover development, Arduino/ESP boards, and sensor integration.

Education

2023 - 2027 | BSc in Computer Science and Engineering

United International University, Dhaka | Expected Graduation: 2027

Experience

October 2025 - Present | Mechanical Team Lead

UIU Mars Rover Team

- Lead mechanical design and fabrication activities for rover development.
- Create mechanical components and assemblies using Fusion 360.
- Coordinate mechanical tasks with other rover sub-teams.

March 2025 - October 2025 | Mechanical Team Member

UIU Mars Rover Team

- Contributed to mechanical design, prototyping, 3D printing, and fabrication.
- Supported mechanical assembly and integration for rover systems.

November 2024 - March 2025 | Mechanical Team Intern

UIU Mars Rover Team

- Assisted with rover prototyping, fabrication, and mechanical assembly tasks.
- Gained practical experience with Arduino, ESP boards, and sensor integration.

Competitions and Achievements

- University Rover Challenge (URC) 2026 - 3rd Place
- University Rover Challenge (URC) 2025 - 6th Place
- Anatolian Rover Challenge (ARC) 2025 - 3rd Place

Technical Skills

Mechanical Design: Fusion 360, component design, assembly design

Robotics: rover development, mechanical integration, prototyping

Fabrication: 3D printing, workshop fabrication, mechanical assembly

Embedded Systems: Arduino, ESP boards, sensor integration

Supporting Software: Python, Git, GitHub, Docker
